

Your Global Leader in Communications Solutions

IP-PBX Systems

A **Panasonic Converged IP-PBX System** is a total solution that gives you the power to manage change at your own pace.

- Easily configures from 2 to 992 extensions (1152 with DXDP).
- Reduces support costs by leveraging your existing data network (uses IP telephony on either LAN or WAN). Also supports SIP trunking.*
- Features easy-to-use and manage Centralized Voice Mail for multiple business locations.
- Enhances the effectiveness of your mobile workforce through wireless connectivity.

Network Cameras

From stylish indoor models that record directly to an SD card, to rugged, splash-proof outdoor dome-mounts, Panasonic offers you the very best in fully-integrated, high-quality network cameras.

- Allows you to record and store video and audio to an SD card.
- Offers full-screen, cell phone and PDA remote monitoring from nearly anywhere in the world via the Internet.
- Provides simultaneous H.264, MPEG-4, and JPEG images for enhanced video quality.

* SIP trunking service offered by telephone service providers.
Consult Panasonic or your local dealer for compatibility.
